Since I really like the new default theme, and I prefer dark themes so my eyes don't hurt as much, I created Adora Dark. Comments, suggestions, etc. are always welcome.

Changelog

- February 26, 2017 - Return to old style template, enable installation via extension manager.
- January 27, 2017 - Update-proof template, page widths at normal dimensions now
- January 23, 2017 - Compatible with Elenor of Tsort & Detritus
- December 24, 2014 - Hrun rebase
- December 23, 2014 - Merge pull request #4 from dfkt/patch-1 Update template.info.txt so Dokuwiki doesn't complain about template being out of date.
- April 10, 2013 - Adjusted color scheme for more contrast.

Download and Install

Use the following URL to download this template:

- Adora Dark

Refer to template on how to install and use templates in Dokuwiki.

Recommended approach (update-proof)

This template is mainly an adjustment of the 'dokuwiki' template with help of its default customization options. The customizing is done in `style.local.ini`. To have an always up-to-date wiki, with just this layout, you only need to adding the next file to your wiki in the directory

<dokuwiki>/lib/tpl/dokuwiki/style.local.ini.

/lib/tpl/dokuwiki/style.local.ini

```
[replacements]

;------------------------------------------------------------------------
----
;------ guaranteed dokuwiki color placeholders that every plugin can
use

; main text and background colors
__text__             = "#eee"            ; @ini_text
__background__       = "#222"            ; @ini_background
; alternative text and background colors
__text_alt__         = "#ddd"            ; @ini_text_alt
__background_alt__   = "#444"            ; @ini_background_alt
; neutral text and background colors
__text_neu__         = "#ccc"            ; @ini_text_neu
__background_neu__   = "#333"            ; @ini_background_neu
; border color
__border__           = "#f90"            ; @ini_border

; highlighted text (e.g. search snippets)
__highlight__        = "#aa6"            ; @ini_highlight

;------------------------------------------------------------------------
----

__background_site__ = "#000"             ; @ini_background_site

; these are used for links
__link__             = "#f90"            ; @ini_link
__existing__         = "#ff8"            ; @ini_existing
__missing__          = "#f43"            ; @ini_missing

; site and sidebar widths
__site_width__       = "100%"            ; @ini_site_width
__sidebar_width__    = "15%"             ; @ini_sidebar_width
```

(This file is derived from style.local.ini)

(Minor: another change is performed as well. The change of width of ToC

```
/* toc container */
#dw__toc {
    width: 75em;
}
```

When desired you can add this change to your `conf/userstyle.css`.)
