

Журнал изменений

Эта статья содержит обзор изменений в официальных релизах «[ДокуВики](#)». Здесь упомянуты только крупнейшие изменения. Полный и детальный журнал всех изменений доступен на «[ГитХабе](#)»

Журнал изменений более старых, чем перечисленные здесь, релизов доступен в статье «[Предыдущие версии](#)» (англ.). Разработчики плагинов и шаблонов должны прочитать и подписаться на [подробный журнал изменений](#) (англ.)

Здесь есть информация относительно тонкостей [обновления](#)

Изменения, отмеченные знаком , требуют внимания при обновлении!

Upcoming Release “Greebo”

- This release requires PHP 5.6 at least!
- PHP 7.2 Support and improvements for PHP 7.3 support
- New form on search page with more search tools  Plugins which modified that page may need adjustments, e.g. [tagging](#) Plugin
 - ability to filter and sort results by time! ☐
- Sending now a `manifest.json` to let the user add DokuWiki to the homescreen
- Re-factored section edit.  Plugins which insert own [section edit buttons](#) need adjustments, e.g. [wrap](#) Plugin
- updated LESS compiler  [Template](#) authors may experience some incompatibilities
- new Action Dispatcher  Plugin authors handling [ACTION_ACT_PREPROCESS](#) may encounter slight differences
- new [Command Line Plugins](#)
- new [Menu system](#)  template authors may want to integrate them (see [Menu](#))
- improved features in `bin/wantedpage.php` CLI
- better cursor handling when inserting multiple images from media popup

Release 2017-02-19e “Frusterick Manners”

- new Admin screen with plugins being able to add their own icons  3rd party templates need adjustments
- jQuery 3 (IE Support for versions <9 dropped)
-  some plugins may need an update.

- **Gallery**: Make sure to update the gallery plugin before you upgrade DokuWiki. Versions before 2016-12-22 render all pages in Frusterick Manners virtually unusable. This includes the login and the admin forms. (Rescue manoeuvre if you happened to fall into the trap: Use regular file tools to move the folder '\$DOKUWIKIROOT/lib/plugins/gallery' out of the way.)
- **ODT**: Versions before 2016-09-10 do not supply the file 'inc/ZipLib.class.php' which is required in Frusterick Manners.
- better cache management and CDN support for jQuery
- PHP 7.1 support and PHP 7.0 bugfixes
- improvements to the internal Form mechanism
- File usage list in media manager
- Various improvements, language updates and bug fixes
-  XMLRPC is only available for PHP 5.4 and higher due to  [usage of certain PHP syntax](#)

Hotfix

- Hotfix 2017-02-19a: fixes installation issue  [1852](#) and media overwrite issue  [1853](#).
- Hotfix 2017-02-19b: fixes security token  [1883](#) and media manager overwrite issue  [1864](#).
- Hotfix 2017-02-19c: fixes reflected XSS issue  [2061](#)
- Hotfix 2017-02-19d: fixes sanitation of \$language  [2080](#); fixes RSS syntax XSS  [2081](#)
- Hotfix 2017-02-19e: fixes rendering null \$language going to GeSHi  [2088](#)

Release 2016-06-26e “Elenor of Tsort”

- New [authPDO](#) plugin; [authmysql](#) and [authpgsql](#) are deprecated 
-  Access check is performed before pages are shown in sidebars of recent templates. (e.g. dokuwiki, starter, writr)
- PHP 7 compatibility fixes
- Internet Explorers 8 (and older) are no longer supported, workarounds have been removed
- Improvements to the new [form](#) class, [auto loading](#) of plugin classes and other improvements for plugin developers
- Show size changes in recent changes
- Better RTL (Arabic, Hebrew) support in Mediamanager
- Support for PHP's builtin web server
- Various improvements, language updates and bug fixes
- Old authentication configurations are not loaded anymore. Requires for some a manual update of configuration settings. (You need to change e.g. `$conf['auth']['ldap']` → `$conf['plugin']['authldap']` and `$conf['authtype'] = 'ldap'` → `$conf['authtype'] = 'authldap'`.)  [1535](#)

Hotfix

- Hotfix 2016-06-26a: fixes  [1616](#) issue with authad.
- Hotfix 2016-06-26b: fixes security issue  [1883](#), and adjusts session ID check to specification.

- Hotfix 2016-06-26c: fixes reflected XSS issue 🐞 [2061](#)
- Hotfix 2016-06-26d: What changed???
- **Hotfix 2016-06-26e: fix rendering null \$language going to GeSHi** 🐞 [2088](#)

Release 2015-08-10a “Detritus”

- This release now requires PHP 5.3.3 at least
- New [Style Manager](#) to adjust template variables like colors
- Experimental new Form class usable for plugin developers
- Use [Composer](#) to add third party libraries
- Various deprecated code has been removed
- The [Extension Manager](#) can now remove old files when updating extensions
- Allow 🐞 [unsetting default](#) acronyms, schemes, entities, etc. in local config
- PHP 7 compatibility fixes
- Page titles now reflect the current action better
- Add [event to let plugin authors send their own popularity data](#)
- Changed all submit buttons from input to button to improve their stylability. 
- Various improvements and bug fixes

Hotfix

- Hotfix 2015-08-10a: fix for issue 🐞 [1296](#) with Extension Manager which prevented installing tarballs and issue 🐞 [1302](#) which prevented links to Windows Shares to work

Release 2014-09-29d “Hrun”

- It's now possible to customize single strings of the [localization](#)
- New history function to see how a wiki looked at a certain time (no user interface yet, details at [date at](#))
- Security fix for AD/LDAP auth plugin related problem ([Details here](#))
- Some caching in the database auth plugins
- Improved CLI interface for better command line tools
- Support for external Audio/Video sources
- Various improvements and bug fixes

Note: When you had disabled the '[compress](#)' config setting, you would enable it again since this release.

Hotfix

- Hotfix 2014-09-29a: fixes for login problems caused by certain PCRE versions and changes in the recent Chrome release
- Security Hotfix 2014-09-29b: prevents XSS attack via SWF uploads
- Security Hotfix 2014-09-29c: fixes privilege escalation in RPC API
- Security Hotfix 2014-09-29d: fixes a XSS vulnerability in the user manager

Выпуск 2014-05-05e «Ponder Stibbons»

- Новая [панель управления дополнениями](#)
- Поддержка [Аудио и Видео](#) файлов
- Обновлено и дополнены иконки [типов файлов](#)
- Отображение формы входа при открытии страниц на которые нет прав доступа.
- Если вы используете [несколько доменов AD](#) для аутентификации, они могут быть выбраны при регистрации.
- Добавлена возможность отображения связанных с пользователем вики-страниц. Опция настраивается с помощью [showuseras](#) и [интервики](#).
- Более гибкий выбор версий страниц при просмотре различий между двумя версиями страниц.
-  Fallback of old date format removed: early wikis need to update their [dformat](#) config setting

 When the layout seems broken, you may be affected by an [issue in the CSS compressor](#). Please try disabling the '[compress](#)' config setting.

Hotfix

- Security Hotfix 2014-05-05a for [Issue 765](#).
- Security Hotfix 2014-05-05b for AD/LDAP auth plugin related problem ([Details here](#))
- Security Hotfix 2014-05-05c: prevents XSS attack via SWF uploads
- Security Hotfix 2014-05-05d: fixes privilege escalation in RPC API
- Security Hotfix 2014-05-05e: fixes a XSS vulnerability in the user manager

Выпуск 2013-12-08 «Любимица»

Оригинальное название — Release 2013-12-08 «**Binky**». Тут возможен и мужской вариант - «Любимчик»

- Улучшен рандом-генератор паролей_
- Добавлен экспорт-импорт пользователей в [User Manager](#) через CSV-файлы
- Реализован [LESS](#)-компилятор для CSS
-  Устаревший [шаблон 'default'](#) удалён
- Пользователи теперь могут удалять свои аккаунты
- Реализации RTL-языков/скриптов, доступность (WAI-ARIA) и [farms](#)
- Множество улучшений перевода и исправлений ошибок
