

View Logs

This interface allows you to view the various logs that are written by DokuWiki. By default, there shouldn't be much here (it depends on your [log settings](#)). However if something goes wrong, chances are high you'll find useful information about the problem. All times are UTC!

Please be aware that **log files can contain sensitive information** like passwords, paths or other secrets. Be sure to redact the logs appropriately when posting them on the forum or in bug reports!
